

The Chrome Dinner

Best Service Provider Award

Meridian Shipping | Arcturus Trading CC

In an industry where timing, reliability and relationships matter, exceptional service is measured not only by what is delivered, but by the confidence clients have in the people delivering it.

Meridian Shipping has earned a reputation within the chrome industry for being a service provider that consistently goes the extra mile. Specialising in tailored shipbroking solutions for containerised cargo and dry bulk vessels, the team connects cargo with the right vessels, at the right time and on the right commercial terms.

But it is the way they do business that has made the greatest impression on those they serve.

Described by industry colleagues as **“always willing to help”**, Meridian Shipping is recognised for its responsiveness, competitive rates, efficient bookings and willingness to find solutions when they are needed most. Behind that service are two industry stalwarts whose experience, dedication and personal approach have built relationships founded on trust.

Whether securing the best possible commercial terms, navigating the pressures of a time-sensitive booking or simply being available when a client needs assistance, their approach remains the same: professional, dependable and delivered with a smile.

Their contribution goes beyond providing a shipping service. They have become a valued partner to the chrome industry and to the businesses that rely on them to keep cargo moving.

For outstanding service, unwavering commitment and a willingness to continually go the extra mile, Meridian Shipping is a deserving nominee for the Best Service Provider Award.
