Best Service Provider Award - Reinhardt Transport Group

A Logistics Group Shaping the Future of Southern Africa's Supply Chains

Reinhardt Transport Group (RTG) is one of Southern Africa's leading logistics groups, moving more than 18 million tonnes of bulk cargo every year.

With a fleet of over 1,100 self-owned trucks and operations that span ports, mines, and borders, Reinhardt Transport Group combines scale with precision. Our strength runs deeper than our fleet; it's built on advanced workshops, material handling, container facilities, and warehouses. Everywhere we operate, one standard applies: safety, responsibility, and performance without compromise.

For over four decades, Reinhardt Transport Group has grown, becoming the preferred logistics partner for many of Africa's leading mining and industrial industries.

RTG's commitment to transformation goes beyond compliance — it is about reinvesting in the communities in which we operate while setting a higher standard for transport and logistics in South Africa. Our approach is focused on creating sustainable opportunities that develop people, build skills and strengthen local enterprise across the transport, logistics and technical sectors.

A key focus is the development of women, with RTG establishing a structured pipeline of opportunity. Since 2019, we have enrolled 30 female learners annually in our accredited Transport Clerk Learnership. Our Bursary Programme further addresses the gender gap in technical fields, supporting eight female students through a three-year National Certificate in Engineering Studies in 2024, followed by 22 female students pursuing N5–N6 qualifications in 2025.

Our commitment extends beyond individual development to creating sustainable local businesses and economic participation. Through our Incubator Programs amongst others, RTG currently supports active enterprises across our operating regions, with a particular focus on developing local transporters and suppliers.

Through these initiatives, RTG is not only investing in people and communities, but actively creating a pipeline of skills, businesses and opportunities that will contribute to the long-term sustainability of the regions in which we operate. In doing so, we strive to demonstrate that operational excellence and meaningful community impact can go hand in hand — setting the standard for responsible, sustainable and transformative transport and logistics.
